

## LeFever Roofing and CeDUR Shakes

It is with great pride and confidence that we take the opportunity to introduce two premier companies to be your best choice when considering the roofing solution for your home. LeFever Roofing is a highly respected, locally owned and operated roofing company that serves the Wisconsin Community. CeDUR, founded in Evergreen, Colorado in 1997 manufactures a beautifully realistic, high performance synthetic roofing shake.

CeDUR shakes are tried and true. For over 20 years CeDUR roofs have endured the most extreme weather conditions throughout the United States. CeDUR's proprietary technology provides stunning wood beauty without constant maintenance, splitting, rotting, warping, or fire risk. CeDUR shakes increase your roofs insulation value, are solid throughout, freeze/thaw resistant, and pass the roofing industry's most difficult testing standards with regards to wind, fire, and impact resistance. CeDUR is at the forefront of roofing technology, their next generation roofing products are engineered using a state-of-the-art polyurethane manufacturing process that delivers long term value, lasting durability, and the most realistic wood look.

Together, CeDUR and LeFever Roofing Company is a winning combination that will give you the lasting roofing solution you deserve.
